

Formatta Launches E-Forms Manager For Growing Markets

Revolutionary Solution for Publishing, Processing and Securely Managing E-forms

Las Vegas , NV - January 11, 2006 - Building on a heritage of enterprise-class, secure XML e-forms software technology, Formatta Corporation today announced the general availability of Formatta E-Forms Manager at the 2006 EMC Software Group Kickoff and Partner Conference.

Formatta is expanding its e-form automation product line to support the rapid-deployment needs of small to mid-size commercial organizations and government agencies that need a budget friendly solution to automate forms-based information processes that can be implemented without any programming skills.

"Formatta's E-Forms Manager is a tremendous tool that delivers immediate payback, says Alan Proctor, VP of Advanced Enterprise Solutions for TechTeam Government Solutions. Installation is a simple and intuitive task that takes less than two hours to get set up and running, and the affordable, highly secure forms management solution, enables customers to streamline forms-based business processes to improve customer service, cut costs, and drive higher ROI."

Based on proven, enterprise-class technology that is in use today at major government agencies and corporations, Formatta E-Forms Manager includes the following key features:

- Centralized forms management for storing, publishing, reporting, and version control
- 128-bit native encryption for data and form security
- Data export into standard formats such as Excel, XML, and CSV
- No pre-set limits on number of forms stored or processed
- Exclusive server-based signing and authentication technology
- Library of pre-designed form templates

A cost-efficient entry point to e-forms automation, Formatta E-Forms Manager also allows users to upgrade to the enterprise-class Formatta Server as processing needs develop without losing any data or redesigning their e-forms.

Important security features prevent unauthorized users from publishing or submitting forms. "Security is a critical factor in electronic data processing," says Joe Lyons, Technical Director at Formatta. "Our e-forms products have security features built-in to the core architecture, assuring our customers that their forms and data are always protected."

About Formatta

Formatta Corporation, founded in 1997 and based in Herndon, Virginia, is the global leader in secure XML e-forms technology. Formatta's unique e-forms solutions model, including Formatta Filler, is the most cost-effective means for businesses and the government to securely distribute, collect and process electronic data using the most common business tool in history – the form. Formatta Corporation is located at: 13921 Park Center Road, Herndon, VA 20171. Tel: (888) 99-FORMS; (888) 993-6767, 703-673-0000; Fax: (703) 673-2201; Email: info@formatta.com; Web: www.formatta.com.
